How Sustainable is your Linear Motion solution?

By now, you're most likely already aware of the many design and application benefits you can realize by converting from hydraulic to electric. But do you know what impact this conversion can have on the sustainability and total cost of ownership of your applications?

The latest generation of electric linear actuators is revolutionizing linear motion designs with groundbreaking strength, smarts and sturdiness, and is opening the door to countless new application opportunities.

[Join us for this 45-minute webinar on 9 May 2023. We will discuss typical scenarios and cast light on these topics:](#)

- Efficiency
- Parasitic losses
- Power consumption
- Maintenance
- Controllability
- Power density

REGISTER NOW

WHY?

Learn more about improving your linear motion applications in regards to more sustainability and reduced total cost of ownership. Achieve more competitive machine designs with electric linear actuators that set you apart from your competitors

[REGISTER TODAY >](#)

WHO?

Presenters:

Anders Karlsson,
Product Line Specialist,
Thomson Industries

Robert Johansson,
Conversion Specialist,
Thomson Industries

WHEN?

Date: 9 May 2023

Day: Tuesday

Time: 9 am CEST

Languages: English

BIBUS Hungary is your partner when you need THOMSON products.
