

# AKM<sup>®</sup> 2G Servo Motor Selection Guide

with AKD<sup>®</sup> Servo Drive Systems

**KOLLMORGEN**<sup>®</sup>

*Because Motion Matters™*

# Kollmorgen: Your partner. In Motion.

Every solution comes from a real understanding of the challenges facing machine designers and users.

**Innovators consistently rate Kollmorgen as one of their best motion systems manufacturing partners.** Whether you are looking for classic servo motors, direct-drive servo motors, stepper motors, drives & amplifiers, gearing, actuation, or CNC & multi-axis motion controllers, Kollmorgen is one of the few companies in the world who actually designs and manufactures all of these products.

**Our customers are leaders** in many industries such as Aerospace & Defense, Printing, Packaging & Converting, Food & Beverage Processing, Medical Imaging, In Vitro Diagnostics & Laboratory Automation, Pharmaceutical Manufacturing, Material Forming and Cutting, Oil & Gas, and Robotics. Kollmorgen is also a leader in Warehouse Automation, including complete AGV systems, software, awareness and autonomy.

**Our Automation Solutions** can be found on Mars and in space, ships and submarines, O&G drilling and metrology, surgical robots and laser eye surgery, even inside artificial hearts. These are just a few applications that demand high-performance and high-quality while satisfying their specific needs.

**Because motion matters, it's our focus:** Motion can distinctly differentiate a machine and deliver a marketplace advantage by increasing its performance and dramatically improving overall equipment effectiveness (OEE).

High-performance motion can make your customer's machine more reliable and energy-efficient, enhance accuracy and improve operator safety. Motion also represents endless possibilities for innovation.

We've always understood this potential, and thus have kept motion at our core and in our Vision, Mission & Values, relentlessly developing products that offer precise control of torque, velocity and position accuracy in machines that rely on complex motion.

## Removing the Barriers of Design, Sourcing, and Time

At Kollmorgen, we know that OEM engineers can achieve a lot more when obstacles aren't in the way. So, we clear obstacles in three important ways:

### Integrating Standard and Custom Products

The optimal solution is often not clear-cut. Our application expertise allows us to modify standard products or develop totally custom solutions across our whole product portfolio so that designs can take flight.

### Providing Motion Solutions, Not Just Components

As companies reduce their supplier base and have less engineering manpower, they need a total system supplier with a wide range of integrated solutions. Kollmorgen offers complete solutions as well as motion subsystems that combine programming software, engineering services and best-in-class motion components.

### Global Footprint

With direct sales, engineering support, manufacturing facilities, and distributors spanning the Americas, Europe, the Middle East, and Asia, we're close to OEMs worldwide. Our proximity helps speed delivery and lend support where and when they're needed.

## Financial and Operational Stability

Kollmorgen is part of Fortive. A key driver in the growth of all Fortive divisions is the Fortive Business System, which relies on the principle of "kaizen" – or continuous improvement. Using world-class tools, cross-disciplinary teams of exceptional people evaluate processes and develop plans that result in superior performance.

## Kollmorgen: Your partner. In Motion.

# ▶ AKM® Servo Motor Family

**Kollmorgen's AKM family of servo motors gives you unprecedented choice and flexibility from a wide range of standard products so you can select the best servo motor for your application.** By pairing AKM servo motors with our family of plug-and-play AKD® servo drives, selecting the right motion control products has never been easier. Pick from thousands of servo motor/servo drive combinations outlined in this selection guide, the AKM Servo Motor Selection Guide, or go to our website to find the best solution for your application.

**Standard AKM/AKM®2G servo motors and AKD servo drives offer the best of both worlds – the exact specifications of a custom solution with the faster delivery times and lower cost of a standard catalog product.** For your truly unique motion control applications, work with our engineering team to customize a solution for your machine design. Either way, standard product or customized, we can help you choose the motion control solution that meets your exact requirements.

## The Benefits of AKM2G Servo Motor

### Smaller Footprint

#### Reduce machine space

- For equivalent torque it is possible to use a smaller size motor than competitive motors.
- The range of AKM2G sizes provides for optimizing for length or flange square depending on which dimension is most critical.
- Use of the smaller motor saves space achieving equivalent performance in a smaller footprint machine or saving space for other machine elements.

### Increased Torque

#### Higher performance

- For a given frame size the AKM2G provides an average continuous torque increase of 30% compared to competitive motors of equivalent size.
- Higher torque in the same package size increases machine performance (greater throughput, move heavier loads, etc.).

### Wider Speed Range

#### Faster operation

- For many AKM2G sizes the maximum speeds are higher than competitive motors.
- Higher speeds ⇒ operate machines faster ⇒ greater throughput.

### Greater Flexibility

#### More options to match needs

- AKM2G is designed to support a wider array of feedback, brake, thermal sensor and shaft seal options – this greater flexibility means a higher probability of meeting application requirements with a standard product.
- The AKM2G design has the potential for greater CoEngineering (modification) thanks to the new housing design. With a more flexible design for CoEngineering addressing applications not covered by catalog standards is increased.

### Higher Efficiency

#### Reduce energy consumption

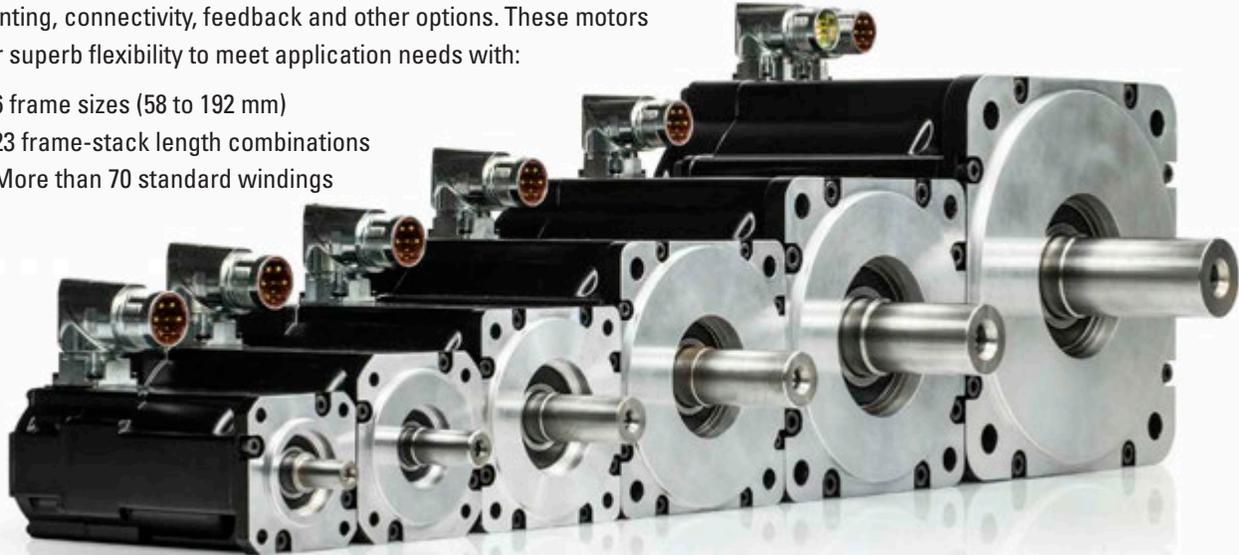

- AKM2G has lower equivalent resistance than competitive solutions. For equivalent motor frame sizes AKM2G will typically be more energy efficient (2-5%).
- Energy consumption is reduced with AKM2G compared to competitors.

# AKM<sup>®</sup> 2G Servo Motor Series

## AKM2G Motors Offer Extremely High Torque Density and High Acceleration

The AKM2G high-performance motor series offers a wide range of mounting, connectivity, feedback and other options. These motors offer superb flexibility to meet application needs with:

- 6 frame sizes (58 to 192 mm)
- 23 frame-stack length combinations
- More than 70 standard windings

### Features

#### Torque

0.64 to 72 Nm maximum continuous torque (5.6 to 640 lb-in) in 23 frame/stack combinations. Specific torques are often available from multiple frame sizes to optimize mounting and inertia matching capabilities.

#### Speed

Speeds up to 8000 rpm meet high speed application requirements. Windings tailored to lower speeds are also available.

#### Voltage

AKM2G motors can be applied to all standard global voltages. Windings are specifically tailored to work with drives powered by 120, 240, 400 or 480 Vac.

#### Mounting

Multiple mounting standards are available to meet common International standards.

#### Feedback

AKM2G motors include resolver, Digital Sine Encoder, or SFD (Smart Feedback Device) feedback options to meet specific application requirements.

#### Smoothness

Smooth performance results from low-cog, low-harmonic distortion magnetic designs.

#### Connectivity

Rotatable IP65 connectors, or straight connectors are both available to provide flexibility. Single connectors/plugs (combined power and feedback) are also available to minimize motor and cable cost (SFD and Sine Encoder only).

#### Thermal

Windings are rated conservatively at 100°C rise over a 40°C ambient while using 155°C (class F) insulation materials. Motors meet applicable UL, CSA, and CE requirements and include thermistors.

#### Additional Options:

- Holding brakes
- Shaft and mounting variations
- Shaft sealing options available
- Custom windings
- Feedback devices
- Thermal sensor options

## Kollmorgen Cables Offer the Complete Solution

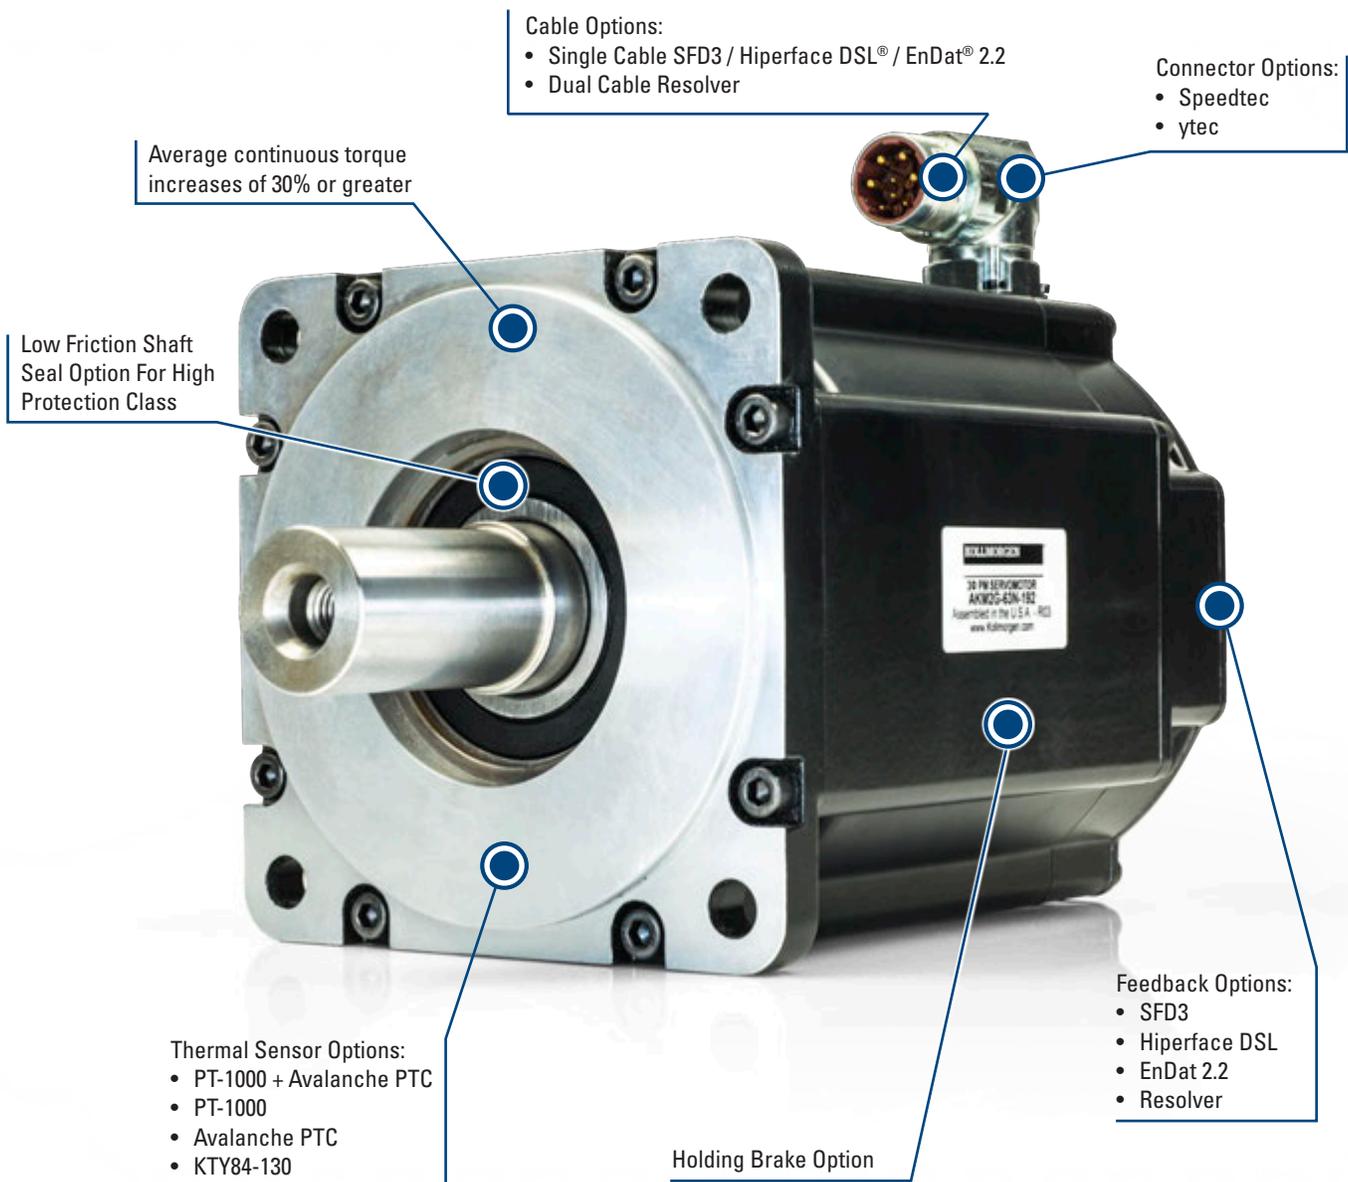

Kollmorgen offers complete cable solutions for connecting drives and motors. This includes static, low cost cable sets for simple applications to high bend, high flex, hybrid cables that combine feedback and power in one cable. Not sure which cable offering would best suit your needs? No problem. Kollmorgen Customer Support is available to discuss cable options and what makes the most sense for your machine.

## AKM® 2G represents the latest evolution of the industry leading AKM motor product family.

With average continuous torque increases of 30%, OEMs and users can achieve substantial machine performance increases without increasing the size of the motor.

The improved torque density allows a smaller motor to be used which reduces the machine footprint without sacrificing performance.

- Extensive Selection of Feedback options to match application and performance requirements
- Shaft, mounting and connector options for optimal flexibility
- Holding Brake option

# AKM<sup>®</sup> Servo Motor Family Options

## AKM<sup>®</sup>2G Servo Motors

### Higher Power Density

### Performance – Efficiency

#### AKM2G-2x

Flange: 58 mm  
Power: 0.204 - 1.12 kW  
Max Speed: 8000 RPM  
Stacks: 4

The smallest AKM2G. For dual cable connection with resolvers the compact YTEC connector is used.

#### AKM2G-3x

Flange: 72 mm  
Power: 0.175 - 1.77 kW  
Max Speed: 8000 RPM  
Stacks: 3

Available with motor-mounted rotatable single or dual cable connectors.

#### AKM2G-4x

Flange: 88 mm  
Power: 0.267 - 2.85 kW  
Max Speed: 6000 RPM  
Stacks: 4

Available with motor-mounted rotatable single or dual cable connectors.

#### AKM2G-5x

Flange: 114 mm  
Power: 0.78 - 5.28 kW  
Max Speed: 6000 RPM  
Stacks: 4

Available with motor-mounted rotatable single or dual cable connectors.

#### AKM2G-6x

Flange: 142 mm  
Power: 1.56 - 7.79 kW  
Max Speed: 6000 RPM  
Stacks: 4

Available with motor-mounted rotatable single or dual cable connectors.

#### AKM2G-7x

Flange: 192 mm  
Power: 2.42 - 11.8 kW  
Max Speed: 6000 RPM  
Stacks: 4

Provides torque levels previously seen only in larger size motors. Offered with motor-mounted rotatable single or dual cable connectors including optional holding brakes. This is available even on the highest torque models.

The entire lineup of AKM2G and AKM servo motors, excluding AKM8, offer a motor-mounted rotatable single connector for Kollmorgen's exclusive third generation Smart Feedback Device (SFD3), and industry standard multi-turn digital encoders like Hiperface DSL and EnDat, as well as incorporating optional brake support.

## AKM® Servo Motors

**Broader Power Range**

**Durability – Economy**

### AKM1

Flange NEMA/mm: 17/40  
Power: 0.08 - 0.30 kW  
Max Speed: 8000 RPM  
Stacks: 3

The AKM11x, the smallest by both stack and length with "M" option connectivity and Smart Feedback Device (SFD)

### AKM2

Flange NEMA/mm: 23/58  
Power: 0.10 - 0.94 kW  
Max Speed: 8000 RPM  
Stacks: 4

The AKM21x frame size shown with "D" motor-mounted rotatable single connector, Commutating Encoder and optional holding brake.

### AKM3

Flange NEMA/mm: na/70  
Power: 0.09 - 1.31 kW  
Max Speed: 8000 RPM  
Stacks: 3

The AKM33x frame size shown with "D" motor-mounted rotatable single connector and SFD feedback.

### AKM4

Flange NEMA/mm: 34/84  
Power: 0.21 - 1.73 kW  
Max Speed: 6000 RPM  
Stacks: 4

The AKM42x frame size shown with "D" motor-mounted rotatable single connector and SFD feedback.

### AKM5

Flange NEMA/mm: 42/108  
Power: 0.56 - 3.87 kW  
Max Speed: 6000 RPM  
Stacks: 4

The AKM51x frame size shown with "C" motor-mounted rotatable double connectors and optional holding brake.

### AKM6

Flange NEMA/mm: na/138  
Power: 1.17 - 6.24 kW  
Max Speed: 6000 RPM  
Stacks: 4

The AKM65x frame size shown with "C" motor-mounted rotatable double connectors and optional holding brake.

### AKM7

Flange NEMA/mm: na/188  
Power: 3.97 - 8.58 kW  
Max Speed: 6000 RPM  
Stacks: 3

The AKM74x frame size shown with "C" option connectivity and holding brake

### AKM8

Flange NEMA/mm: na/260  
Power: 12.4 - 19.8 kW  
Max Speed: 3000 RPM  
Stacks: 3

### AKM83x

The largest AKM by both frame and length with "T" Terminal Box and SFD Feedback.

**This Selection Guide focuses on the AKM2G product in detail; refer to the AKM Selection guide for detailed information on AKM motors.**

# AKM<sup>®</sup> Servo Motor Family Options

## AKM<sup>®</sup> Washdown and Food Grade

These motor variants are used in applications that are subject to strict hygiene regulations in which it is essential that the formation of nuclei and corrosion are avoided and in which machines must be cleaned cyclically. These motors are based on the standard types AKM2 – AKM6 with special modifications for use in the food-processing industry, in the packaging industry, or even outdoors. An option for AKM Washdown and Washdown Food motors is to coat the flange.

### AKM Washdown

#### Part Numbers:

AKMxxx-xxxx-0W: Washdown with unpainted flange

AKMxxx-Wxxxx-0W: Washdown with painted flange

**Note: The AKM Washdown motors must not come into contact with any unpacked food.**

Application Area:	Harsh Environments, Outdoors
Application Examples:	Transport in the food and packaging area without contact with food, radar stations, and wind turbines
Standards:	UL, CE, RoHS
Surface:	Gray 2K paint
Immunity:	Against tested industrial cleaning agents*, corrosion-resistant
Degree of Protection:	IP67
Shaft:	303 Stainless steel (CSN417029)
Rotary Shaft Seal:	PTFE
Lubricant:	Industrial bearing grease, non-food-grade
Connector:	Stainless steel, smooth surface
Screws:	Stainless steel
Name Plate:	Engraved, additional name plate in the package

### AKM Washdown Food Grade

#### Part Numbers:

AKMxxx-xxxx-0F: Washdown with unpainted flange

AKMxxx-Wxxxx-0F: Washdown with painted flange

**Note: The surface of the washdown food motor has passed all tests as per FDA Global Migration for indirect contact with food. Any direct contact with unpacked food is not permitted.**

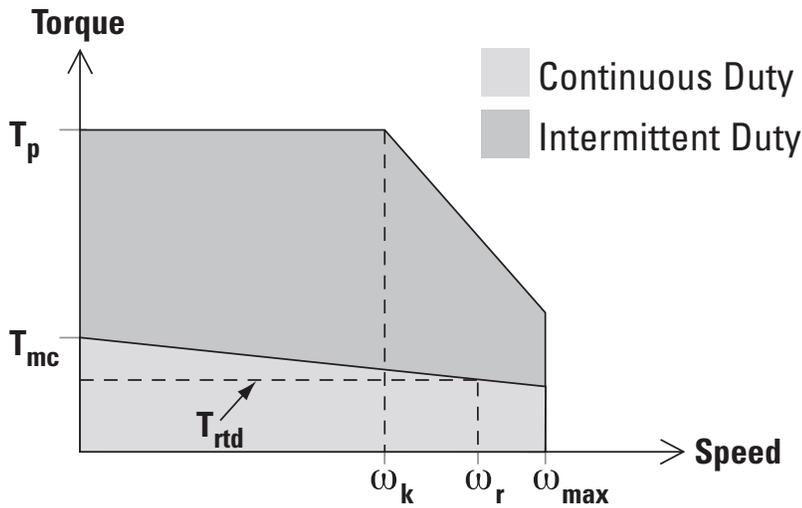

Application Examples:	Food and beverages industries; cutting, packing, and filling without direct contact with food; motor positioned laterally or below the food.
Standards:	UL, CE, RoHS, FDA
Surface:	White 2K FDA compliant paint**
Immunity:	Against tested industrial cleaning agents*, corrosion-resistant
Degree of Protection:	IP67
Shaft:	303 Stainless steel (CSN417029)
Rotary Shaft Seal:	PTFE as per FDA
Lubricant:	Food grade as per FDA
Connector:	Stainless steel, smooth surface
Screws:	Stainless steel
Name Plate:	Engraved, additional name plate in the package

\* Resistance of the AKM Washdown and AKM Washdown Food Grade surfaces to the following industrial cleaning agents has been tested: P3-topactive DES, P3-topactive LA, P3-topax 56, P3-topax 66, P3-topax 91

\*\*Meets FDA global migration standards

# AKM<sup>®</sup> 2G Systems Overview

Definitions	
$T_p$	- Peak torque
$T_{mc}$	- Maximum Continuous Torque
$T_{rtd}$	- Continuous rated torque (torque at rated power)
$\omega_{max}$	- Maximum speed
$\omega_r$	- Rated speed (speed at rated power)
$\omega_k$	- Speed at knee in peak envelope (intersection of system peak torque with voltage limit line)

For detailed speed/torque curves, please refer to Kollmorgen's Motioneering Application Sizing programs.

## How to Build a Servo Drive and Motor System

System torque/speed information on the following pages is designed to help you select the optimum brushless servo motor/drive combination. The nominal values in this data illustrate performance for the recommended motor/controller systems.

## Drive and Motor Performance Curves

The performance characteristics of a brushless servo system (motor/drives combination) are described by a torque/speed operating envelope. As shown above, the shaded areas of the curve indicate the continuous duty and intermittent duty zones of the system.

### Continuous Duty Zone

The continuous duty zone is bordered by the maximum continuous torque line up to the intersection with the intermittent duty line. The continuous torque line is set by either the motor's maximum rated temperature, or the drives' rated continuous current output, whichever is less. The system voltage line is set by the voltage rating of the drives, the line voltage supplied, and the motor winding. The system can operate on a continuous basis anywhere within this area, assuming the ambient temperature is 40°C or less.

### Intermittent Duty Zone

The intermittent duty zone is bordered by the peak torque line and the system voltage line. The peak torque line is set by either the drives' peak current rating, which the drive can produce for a limited time, or the maximum rated peak current for the motor, whichever is less. Refer to the Rating Data on the pages that follow. Note: Higher torque levels may be achievable at higher power levels.

Consult Kollmorgen Customer Support for more details. The system voltage line is set by the voltage rating of the drive, the line voltage applied and the motor winding. Operation in the intermittent zone must be limited to a duty cycle that will produce an RMS system torque falling within the continuous duty area. The RMS torque value is a function of the magnitude of the intermittent torque and the percentage of the time spent at that torque.

### De-rate Calculations

De-rate curves shown for each motor (refer to pages 20-21, 26,30-31,36-37,42-43, and 48-49) assume continuous operation at the selected speed and at maximum rated temperature. Operating intermittently and/or at less than rated temperatures will reduce the De-rate. Kollmorgen Customer Support is available to discuss the specifics of your application and optimum sizing.

**Notes:**

- ① Motor winding temperature rise, ΔT = 100° C, at 40° C ambient.
- ② Measured at 25° C.
- ③ Add parking brake if applicable for total inertia.
- ④ Brake motor adds 0.45 kg [1.0 lbs]
- ⑤ Shaft seal increases Static Friction by 0.020 Nm [0.21 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

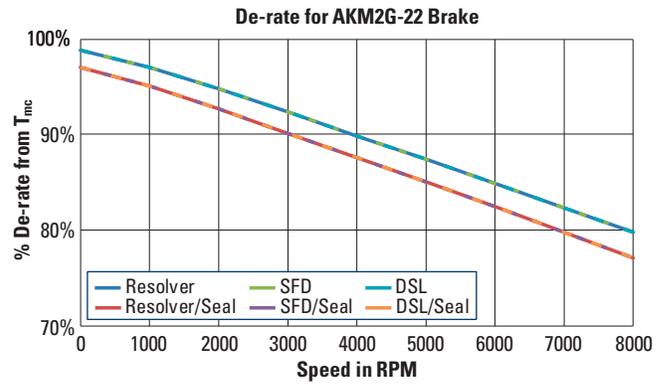

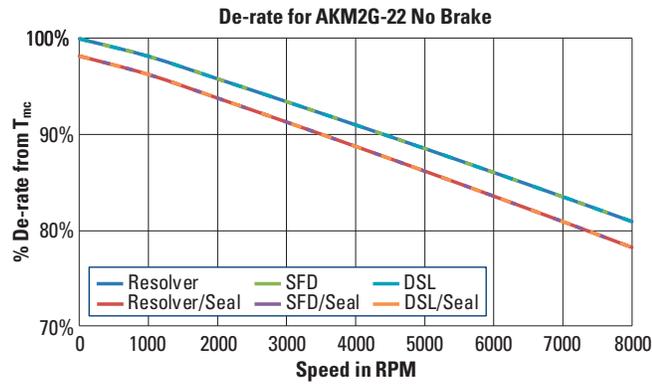

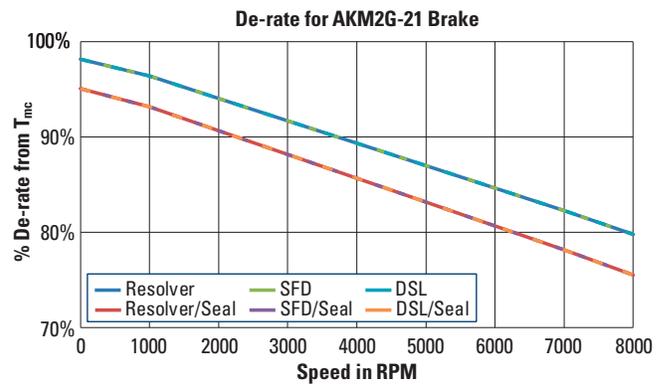

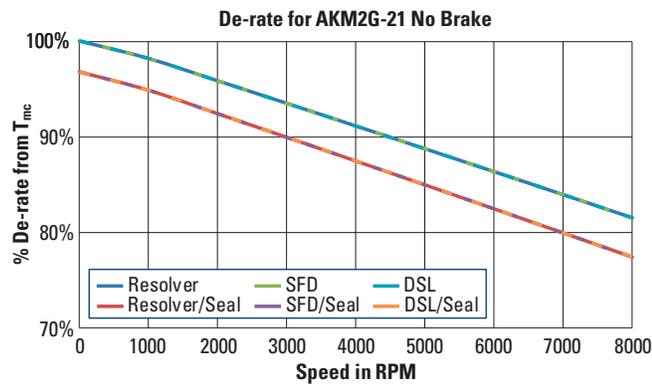

# AKM2G-2x De-rate Curves

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations.

**Example:**

For an AKM2G-21 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 10.1% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .899 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen's Motioneering Application Sizing programs.

For EnDAT motor De-rate information, please contact the factory.

- ④ Brake motor adds 0.72 kg [1.6 lbs]
- ⑤ Shaft seal increases Static Friction by 0.017 Nm [0.15 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

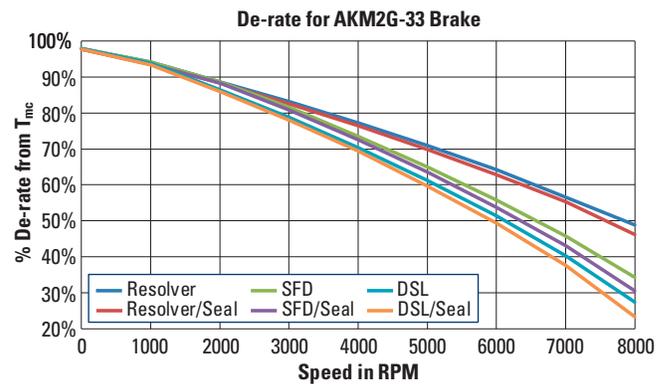

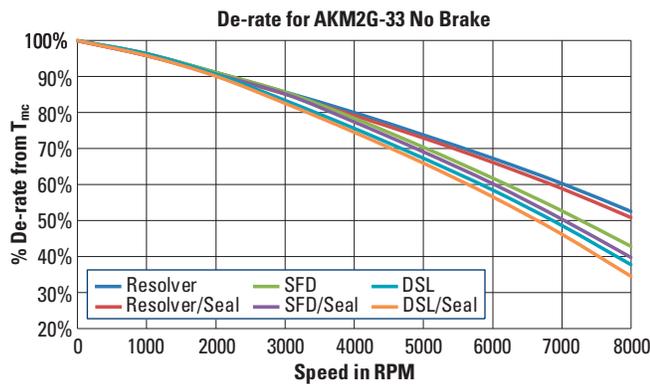

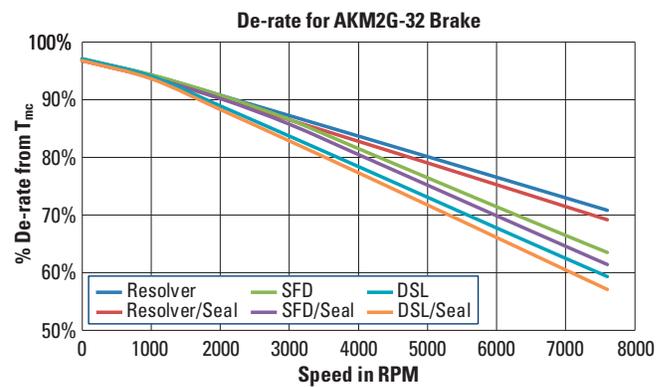

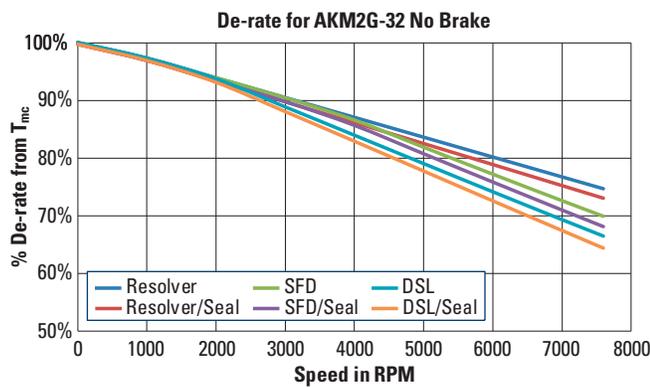

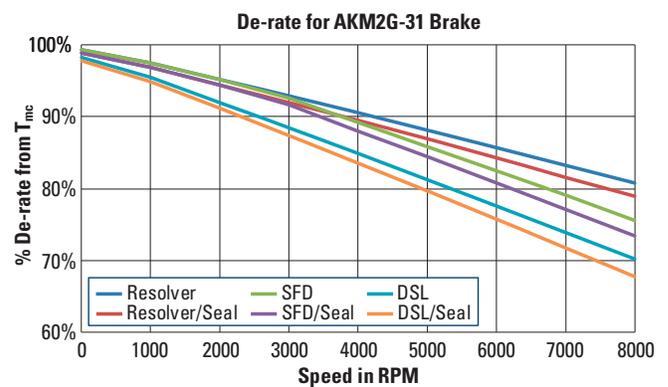

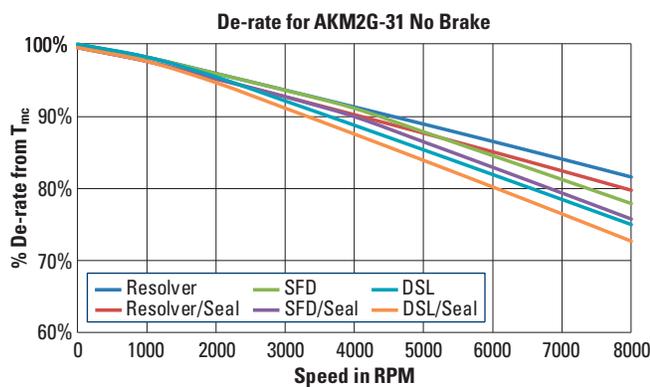

# AKM2G-3x De-rate Curves

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations.

## Example:

For an AKM2G-31 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 7.3% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .927 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen's Motioneering Application Sizing programs.

For EnDAT motor De-rate information, please contact the factory.

**Notes:**

- ① Motor winding temperature rise, ΔT = 100° C, at 40° C ambient.
- ② Measured at 25° C.
- ③ Add parking brake if applicable for total inertia.
- ④ Brake motor adds 1.36 kg [3.0 lbs]
- ⑤ Shaft seal increases Static Friction by 0.023 Nm [0.20 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

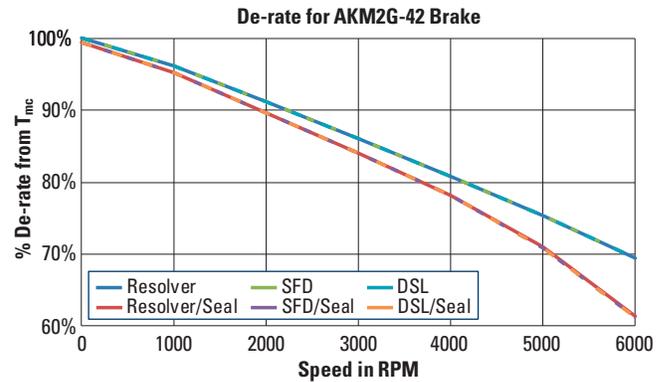

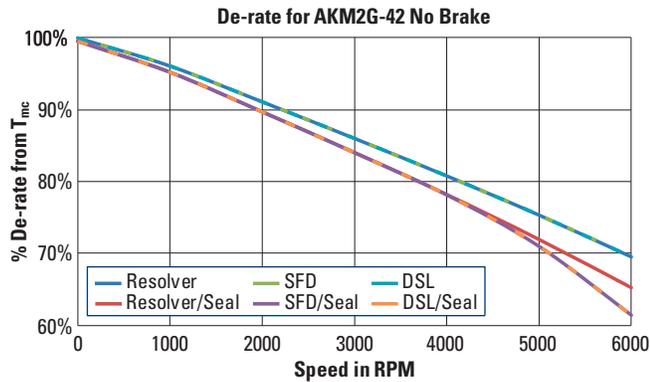

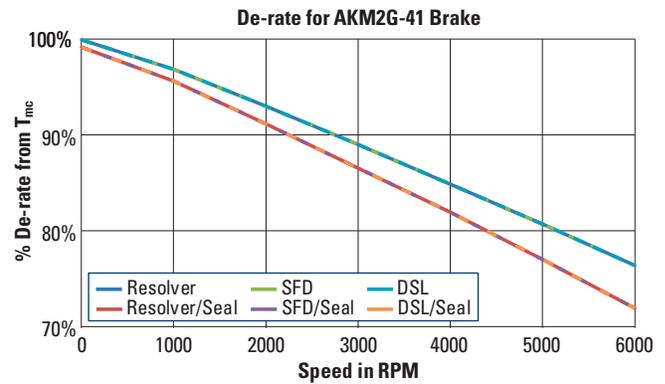

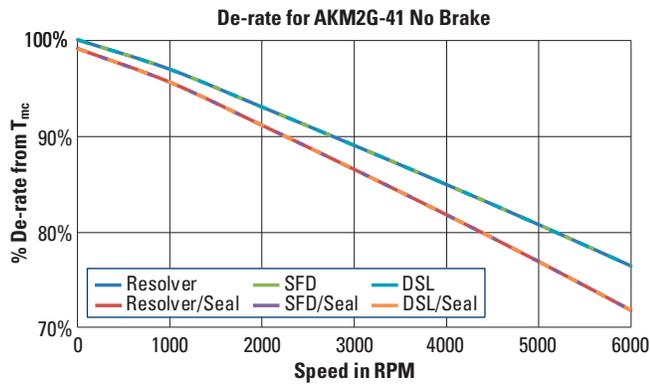

# AKM2G-4x De-rate Curves

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations.

**Example:**

For an AKM2G-41 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 13.5% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .865 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen's Motioneering Application Sizing programs.

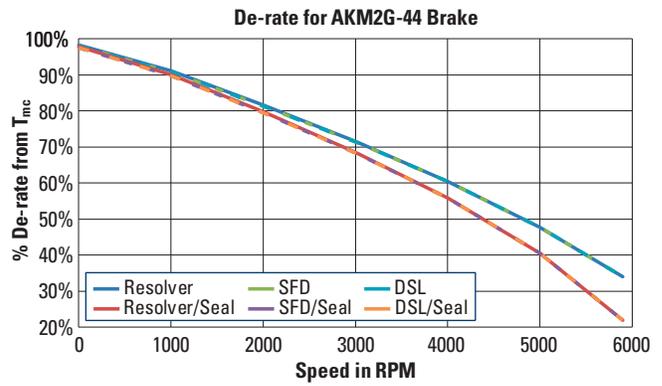

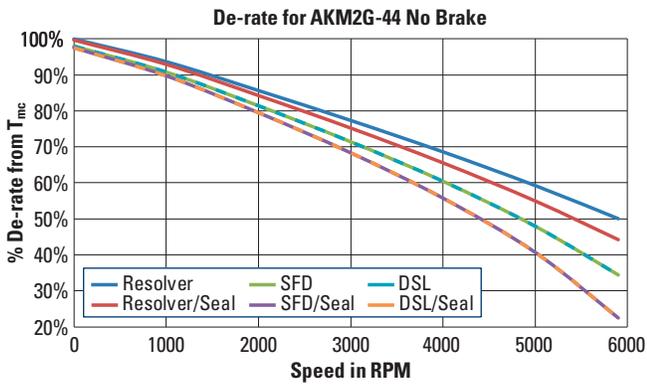

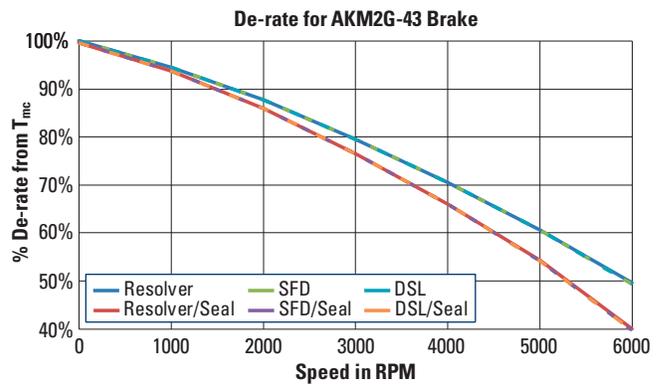

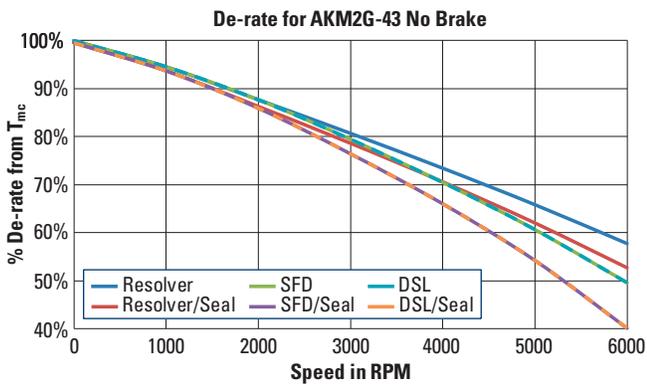

For EnDAT motor De-rate information, please contact the factory.

**Notes:**

- ① Motor winding temperature rise, ΔT = 100° C, at 40° C ambient.
- ② Measured at 25° C.
- ③ Add parking brake if applicable for total inertia.
- ④ Brake motor adds 2.6 kg [5.7 lbs]
- ⑤ Shaft seal increases Static Friction by 0.07 Nm [0.62 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

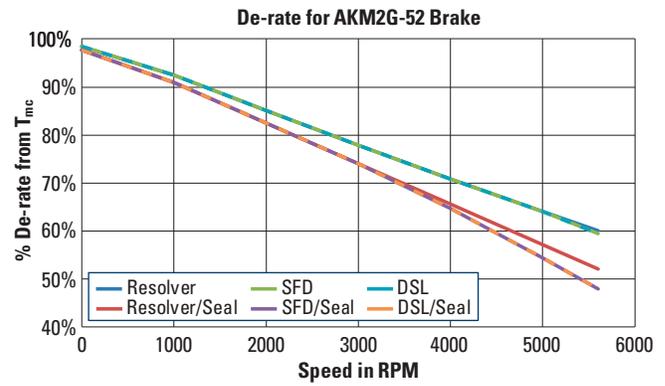

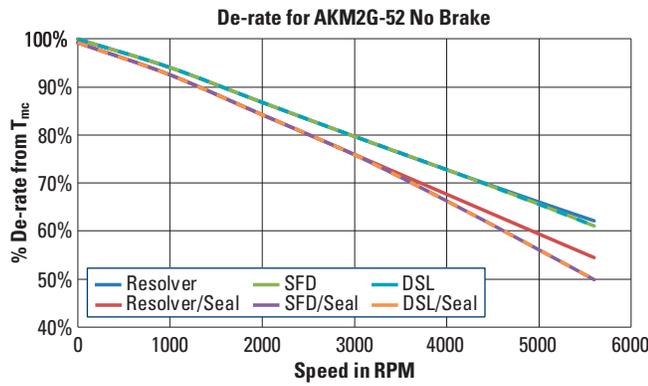

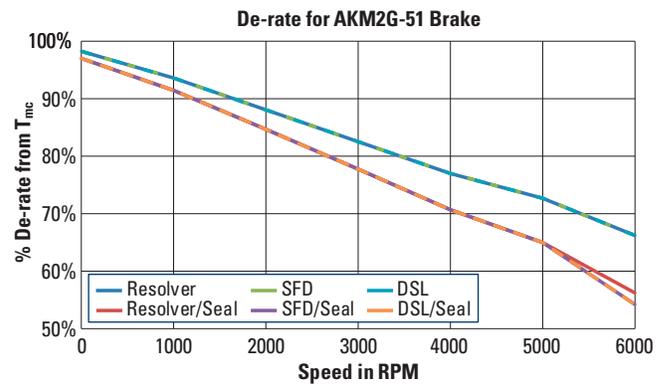

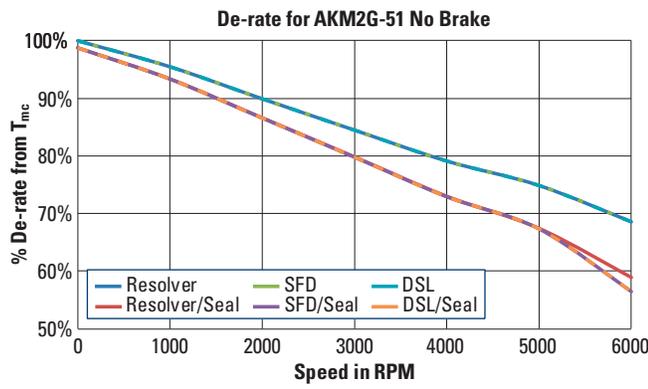

# AKM2G-5x De-rate Curves

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations..

**Example:**

For an AKM2G-51 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 19.1% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .809 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen’s Motioneering Application Sizing programs.

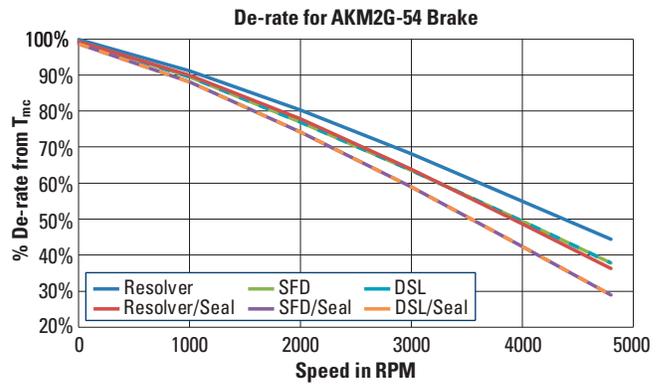

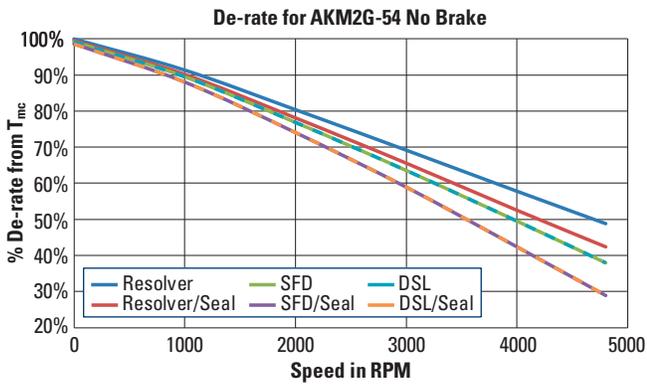

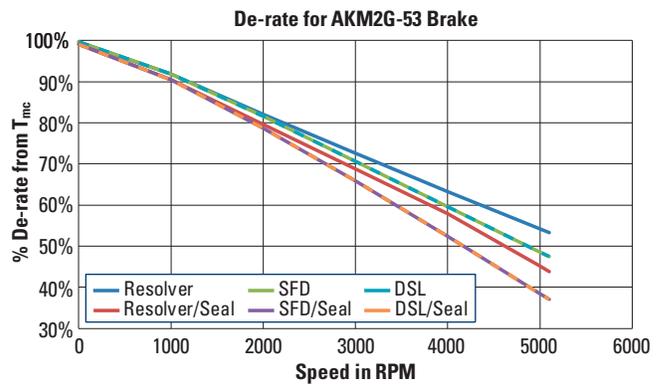

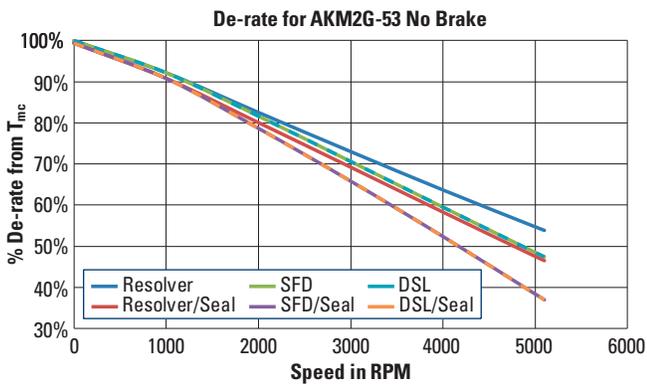

For EnDAT motor De-rate information, please contact the factory.

**Notes:**

- ① Motor winding temperature rise, ΔT = 100° C, at 40° C ambient.
- ② Measured at 25° C.
- ③ Add parking brake if applicable for total inertia.
- ④ Brake motor adds 4.5 kg [10.0 lbs]
- ⑤ Shaft seal increases Static Friction by 0.12 Nm [1.06 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

# AKM2G-6x De-rate Curves

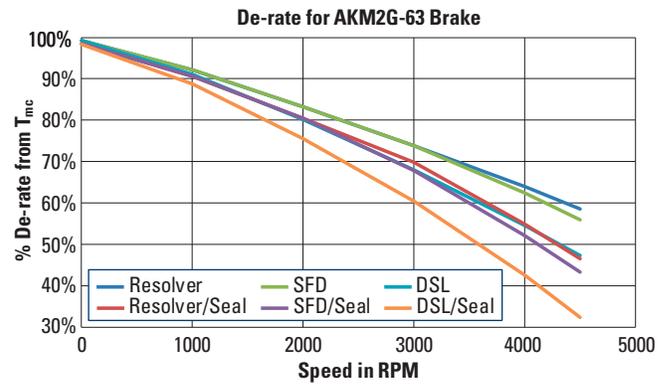

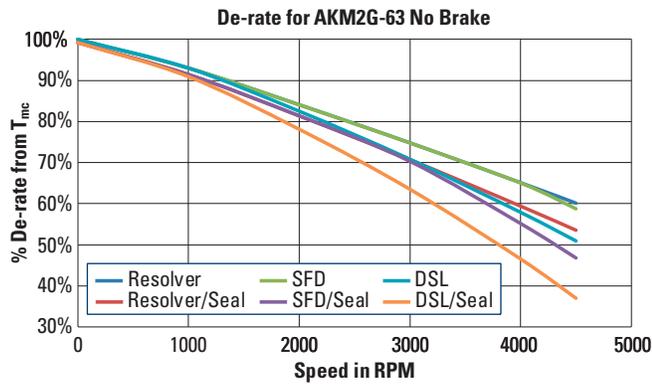

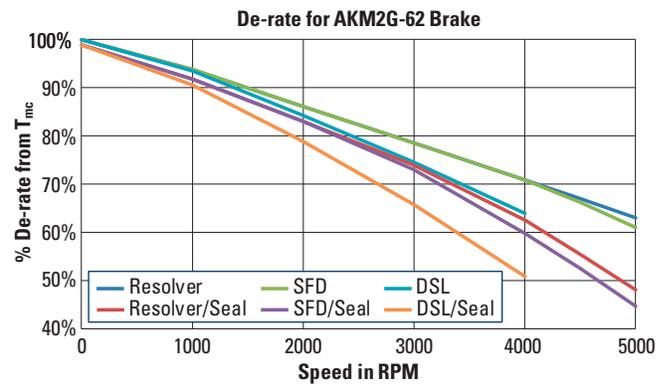

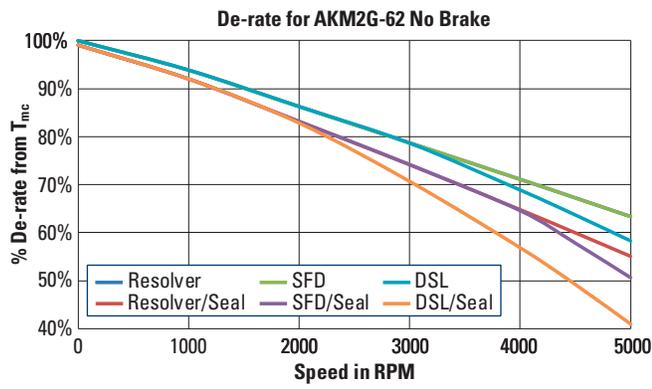

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations.

**Example:**

For an AKM2G-62 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 25.8% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .742 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen's Motioneering Application Sizing programs.

For EnDAT motor De-rate information, please contact the factory.

### Notes:

- ① Motor winding temperature rise,  $\Delta T = 100^\circ \text{C}$ , at  $40^\circ \text{C}$  ambient.
- ② All data referenced to sinusoidal commutation.
- ③ Motor with resolver feedback and standard heat sink.
- ④ May be limited at some values of Vbus.
- ⑤ See de-rate curves for the de-rate of different motor options
- ⑥ Rated speed for motors equipped with a brake are limited to 3500 RPM.

**Notes:**

- ① Motor winding temperature rise, ΔT = 100° C, at 40° C ambient.
- ② Measured at 25° C.
- ③ Add parking brake if applicable for total inertia.
- ④ Brake motor adds 9.1 kg [20 lbs]
- ⑤ Shaft seal increases Static Friction by 0.25 Nm [2.2 lb-in]
- ⑥ This value is calculated from the Torque Constant and Resistance. Refer to those values and notes ① & ② for additional details.

\*Complete AKM2G series model nomenclature can be found on page 66.

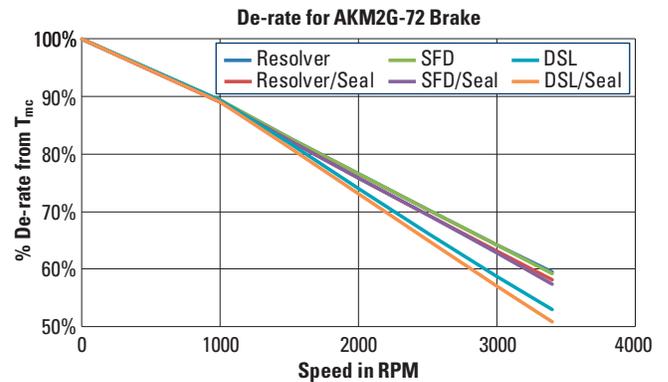

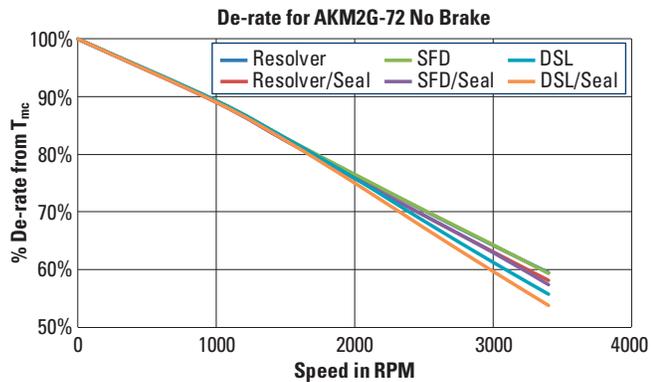

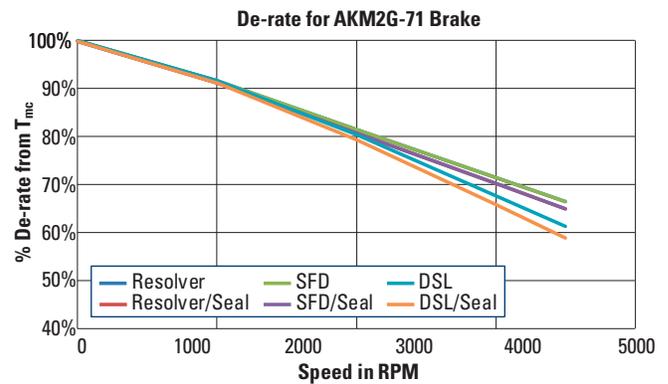

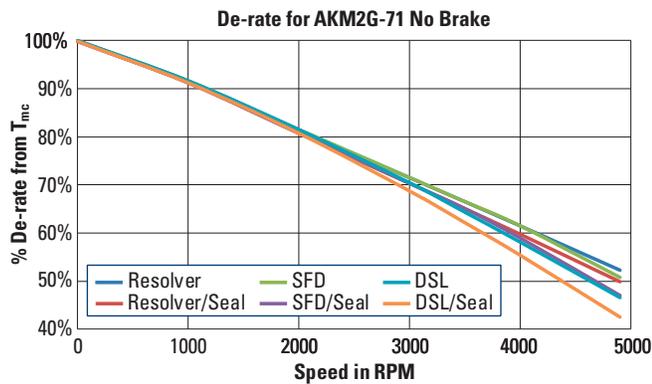

# AKM2G-7x De-rate Curves

De-rate is calculated by multiplying the torque value ( $T_{mc}$ ) by the percentage De-rate for the appropriate feedback either with or without shaft seal at the desired speed point. Also, use the correct De-rate graph for the motor based on whether it will have a brake or no brake. Refer to De-rate Calculations in the AKM2G Systems Overview on page 11 for additional details about De-rate calculations.

## Example:

For an AKM2G-71 motor with an SFD feedback with shaft seal and no brake operating at 3000 RPM there is a 24.8% De-rate. Multiply the motor torque value ( $T_{mc}$ ) by .752 for the rated torque at 3000 RPM. For ease of interpretation of the graph using a De-rate that is a rounded approximation is acceptable. For exact values refer to Kollmorgen's Motioneering Application Sizing programs.

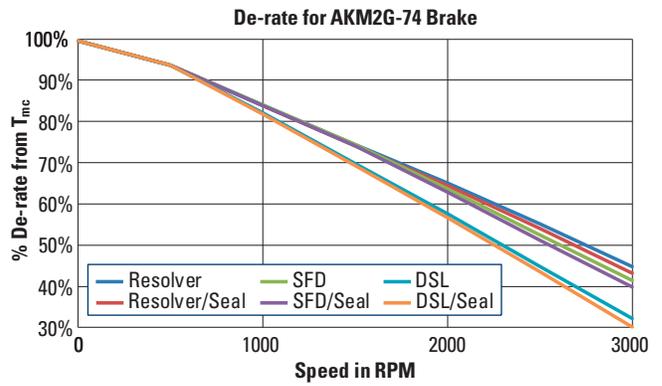

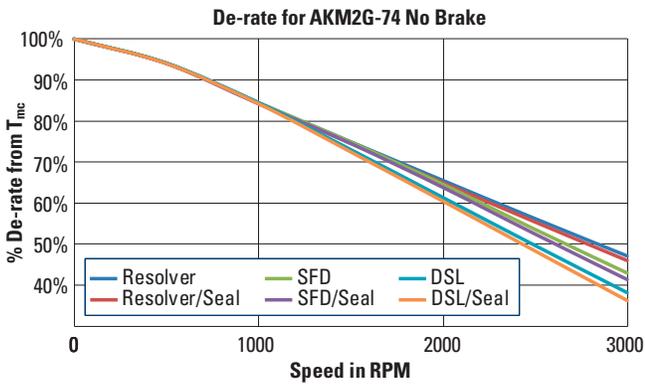

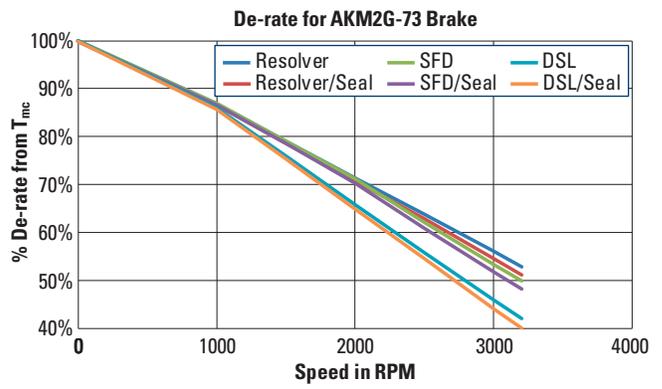

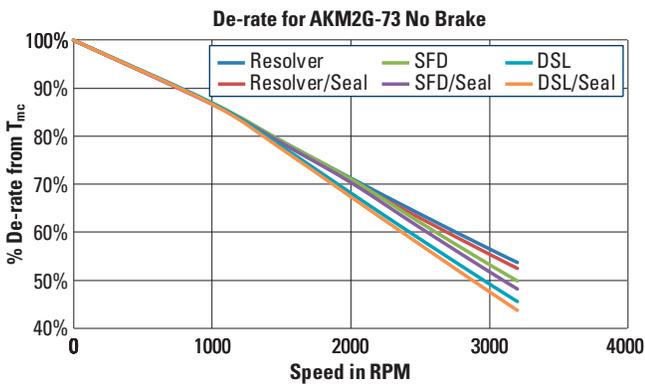

For EnDAT motor De-rate information, please contact the factory.

# L10 Bearing Fatigue and Shaft Loading

# L10 Bearing Fatigue and Shaft Loading

## Shaft Loading

Motor	Max. Radial Force (N)	Max. Axial Force (N)
AKM2G-2	195	600
AKM2G-3	340	600
AKM2G-4	560	1400
AKM2G-5	890	1740
AKM2G-6	2000	2200
AKM2G-7	2670	3000

The maximum radial load ratings reflect the following assumptions:

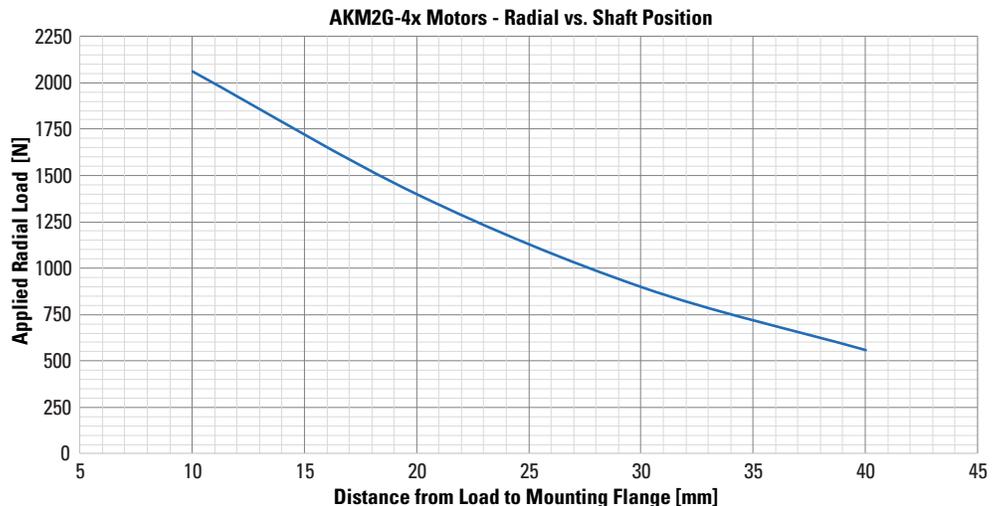

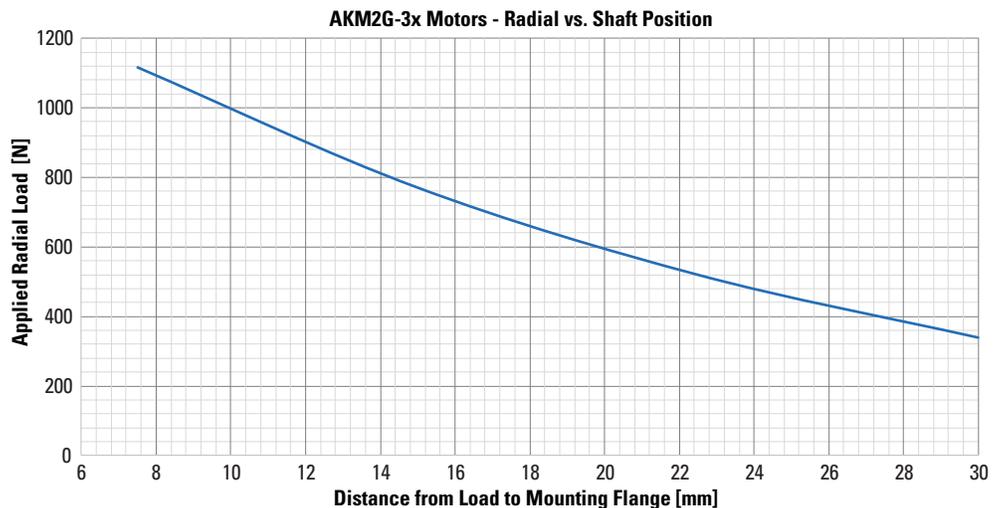

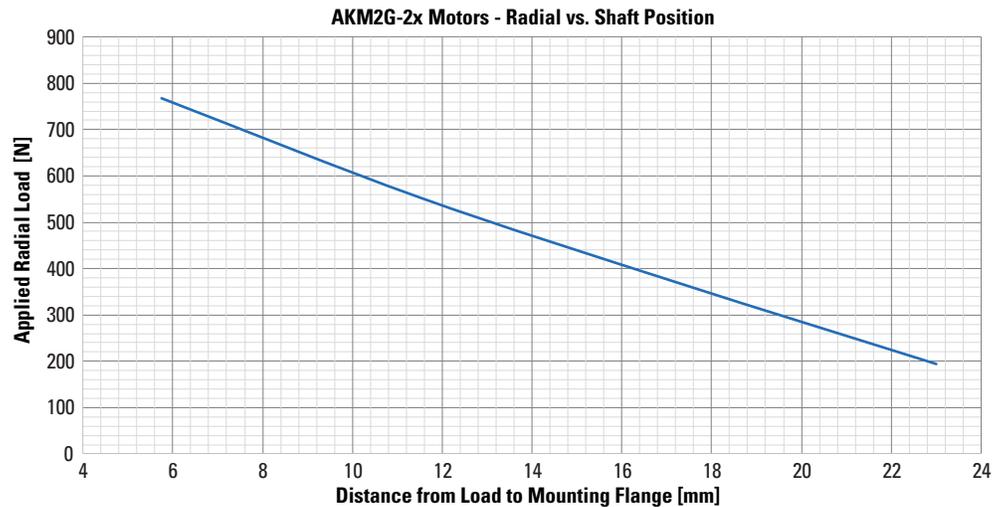

1. Motors are operated with peak torque of the longest member of the frame size.
2. Fully reversed load applied to the end of the smallest diameter standard mounting shaft extension.
3. Infinite life with 99% reliability.
4. Safety factor = 2.

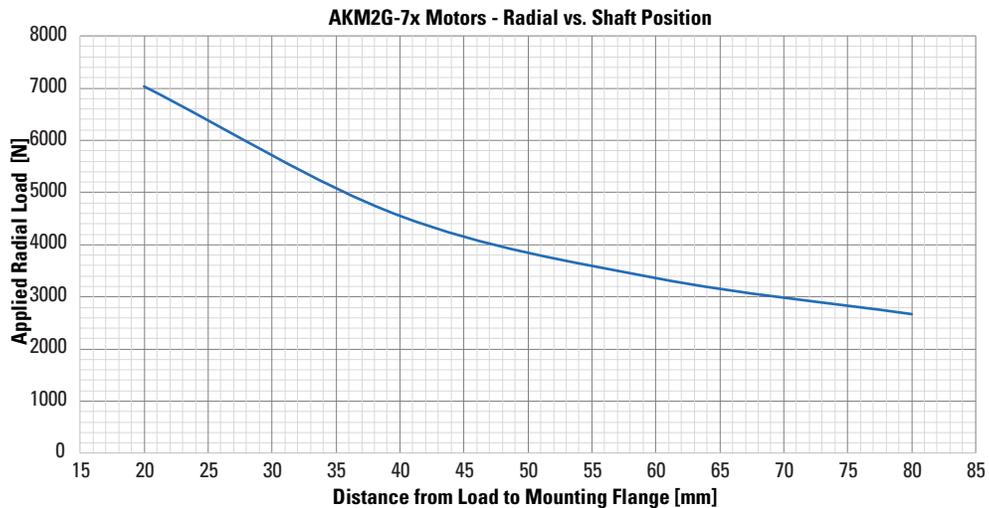

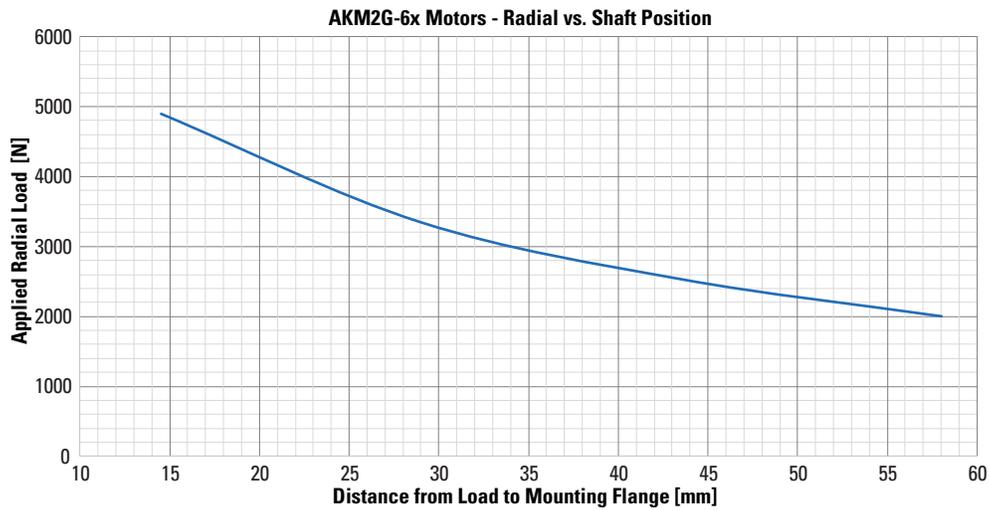

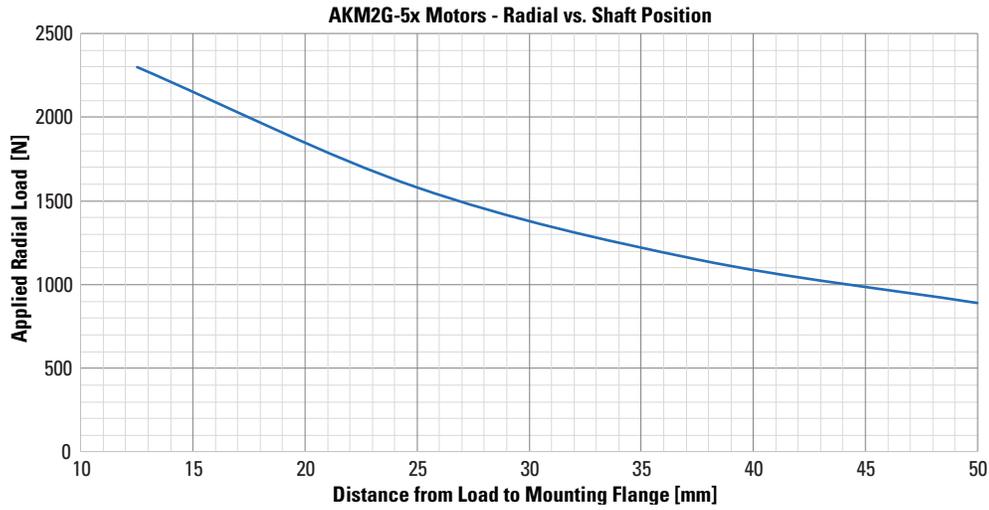

## Teflon Shaft Seals

There is a normal break-in period for our Teflon® shaft seals. Best conditions during the break-in period would be at the operational temperature and speed that would be typical for the application.

During the break-in period, some “shedding” of Teflon material is normal. The debris is not a sign of seal deterioration or failure. The material “shed” should be reduced with usage.

Typically, a few hours at operational speed is enough to break-in the shaft seal.

# Thermal Sensor Protective Devices

The standard version of each motor is fitted with an electrically isolated PT-1000+ PTC. The thermal sensors do not provide any protection against short, heavy overloading.

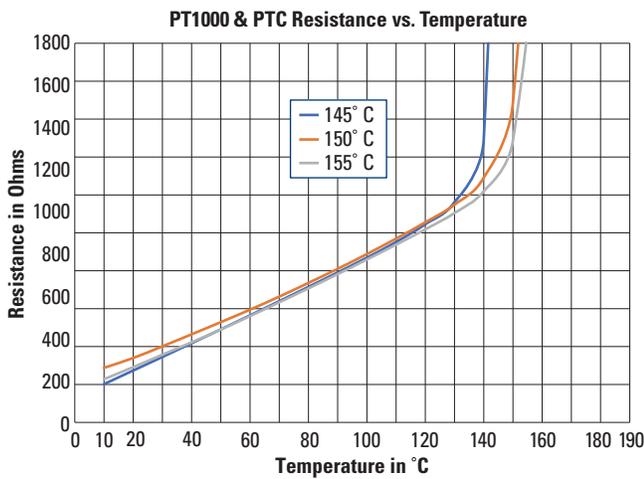

The motor can be delivered with a PT-1000, PTC, or KTY 84-130 equivalent sensors optionally (see Thermal Sensor options 1, 2, 3).

With digital feedback system SFD3, CA the temperature sensor status is transmitted digitally and evaluated in the drive.

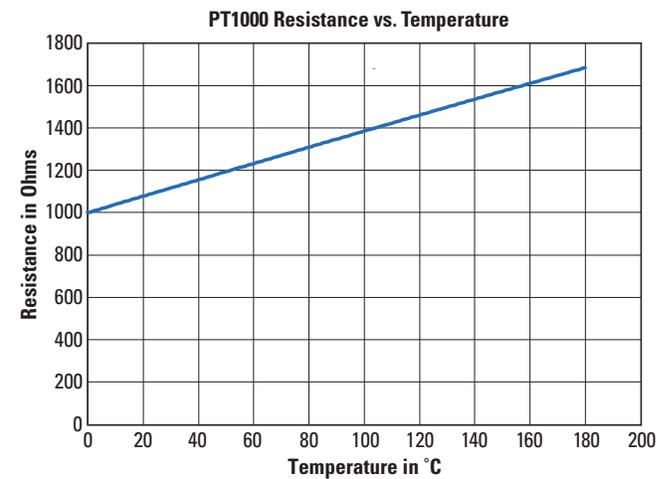

Provided that our configured feedback cables are used, the sensor is integrated into the monitoring system of the digital servo amplifiers.

## Thermal Device Options: Resistance vs. Temperature Graphs

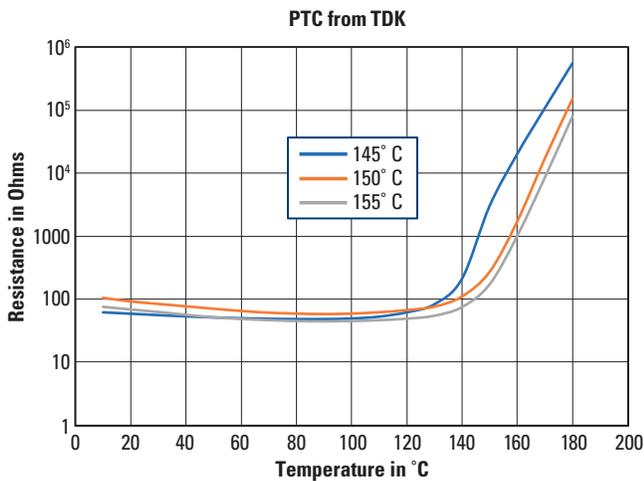

### Standard Option

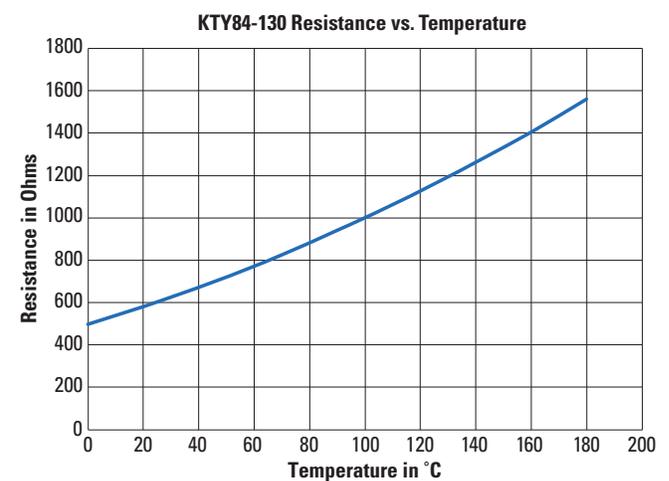

### Option 1

### Option 2

### Option 3

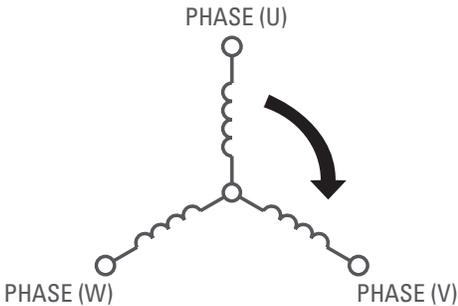

# Notes

A large grid of graph paper for taking notes, consisting of approximately 30 columns and 40 rows of small squares.

# Feedback Options

## Phasing Diagram - All Motors

### Motor Winding Configuration

### General notes:

1. When motor is rotated CW (viewed from drive shaft end), these waveforms result:  
Voltage U, leads V, leads W.  
Voltage U-W leads Voltage V-W by 60° electrical.
2. PTC thermistor (155°C ± 5°C switching temperature) installed.  
Resistance at 25°C: ≤550 ohms.  
Switching Resistance: ≥1330 ohms within ±5°C of switch temperature.
3. Optional KTY84-130 equivalent Nominal Resistance at 25°C, 603 ohms.
4. When optional shaft seal is included on front shaft extension, note that static friction stated in catalog or on winding data sheet is measured without shaft seal installed.
5. Standard outline drawings showing mounting dimensions and standard winding information are available on our website or by calling the Kollmorgen Customer Support at 1-540-633-3545, or through email at support@kollmorgen.com.

## Feedback Summary for AKM2G Servo Motor with AKD Servo Drive

Feedback Device/ (Motor designation)	Plug & Play, Motor ID <sup>2</sup>	AKM2G Models	Device Resolution Cycles or Lines/rev	Resolution after AKD Interpolation <sup>3</sup> : counts (arc-min)	System Accuracy: Arc-min (±)
Resolver (R-)	N	AKM2G 2-7	1	65536 (0.330)	8
SFD3 <sup>2</sup>	Y	AKM2G 2-7	16,777,216 (0.00129 arc-min)	N/A	16
Hiperface DSL Capacitive <sup>1,2</sup>	Y	AKM2G 2-7	32	2,097,152 (0.0103)	4.66
EnDat 2.2 Inductive enc. Multi- turn <sup>1,2</sup> (LD)	Y	AKM2G 2,3,4	16	1,048,576 (0.0206)	8
		AKM2G 5,6,7	32	2,097,152 (0.0103)	4.66

Note 1: Provides 4096 turns of absolute positioning.

Note 2: These feedback devices include electronic motor nameplate data allowing plug-and-play commissioning, eliminating the need for drive parameter set-up and servo loop tuning in most applications.

Note 3: AKD interpolation for sinusoidal feedback devices is 2<sup>16</sup>, however the resulting usable resolution for positioning may be much less for very high resolution systems.

# Servo Motor Feedback Combinations

## AKM2G Family of Servo Motors with Smart Feedback Device (SFD3)

The SFD3 Feedback communicates with the drive over a two-wire interface. Two wires supply +5V power at <150 mA and is an RS-485 digital communications link. The device includes EEPROM memory to save motor parameters.

### Angle Measurement:

Resolution:  $2^{24} = 16,777,216$  counts per rev  
 = 0.0013 arc-min  
 Accuracy:  $< \pm 0.75$  arc-min electrical + sensor error  
 Size 15 sensor  $\pm 9$  arc-min net (AKM2G 2,3,4)  
 Size 21 sensor  $\pm 9$  arc-min net (AKM2G 5,6,7)  
 Electrical Noise:  $< 2^{-17}$  Rev rms at full bandwidth  
 Bandwidth:  $> 2000$  Hz at -3 dB  
 $> 1000$  Hz at -45° phase lag  
 Max Tracking Rate:  $> 50,000$  RPM  
 Velocity Ripple:  $< 0.2\%$  p-p electronics only  
 Size 15 sensor  $< 1.5\%$  p-p net (AKM2G 2,3,4)  
 Size 21 sensor  $< 1.5\%$  p-p net (AKM2G 5,6,7)  
 Velocity Noise:  $< 4$  RPM rms at full bandwidth

### Digital Communications:

Baud Rate: 2.5 Mbaud  
 Signaling: RS-485 differential, 8 bit data with odd parity compatible with standard UARTs  
 Update Period: Once every 62.5 uSec new position sample  
 Error Detection: 5 bit CRC in addition to parity check  
 EEPROM Memory: Does a data dump when the unit powers up.

### Power Supply:

Supply at Drive:  $5.0 \text{ V} \pm 0.25 \text{ V} (\pm 5\%)$   
 Supply at SFD3 in motor: 4.25 V to 5.25 V  
 Nominal Supply Current: 120 mA  
 Worst Case Supply: 150 mA  
 Cable Resistance: +5V, Rtn:  $< 3.3$  Ohm net

### Environmental:

Operating Ambient: -20 to 120° C  
 Humidity: 10% to 90% non-condensing  
 Storage Temperature: -40 to 135° C

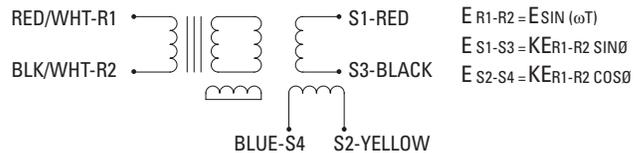

## Resolver (Feedback)

Resolver Data	Units	AKM2G 2, 3, 4	AKM2G 5, 6, 7
		1 Speed	1 Speed
Input Voltage	$V_{\text{RMS}}$	7.0	7.0
	k Hz	10	10
Input Current Max.	mA	50	50
Transformation Ratio	10%	0.5	0.5
Null Voltage	$mV_{\text{RMS}}$	30	30
Max. Error (pk-pk)	MINS.	18	18
Phase Shift	Degrees	0	0
Operating Temperature	°C	-55° to 155°	-55° to 155°
Rotor Inertia Max.	kg-cm <sup>2</sup>	0.046	0.497

### Resolver Alignment

With positive DC current into phase W and out of phase V (U floats) the resolver is aligned to electrical  $\pm 5$  counts. ie. Voltage S1-S3 set to null voltage S2-S4 max in phase with reference (R1-R2).

Type		EQI 1131	EQI1331

# Brake Option

## Failsafe, Holding Brake

The holding brake is designed to provide static holding torque to the motor shaft with the brake coil de-energized. The brake must first be released (coil energized) prior to commanding motor rotation as determined by its drop-out time. The brake is intended for holding or “parking” of a stationary motor. It is not intended for dynamic braking. There should be absolutely no motion of the rotor when power is removed from the brake coil.

### AKM2G Motor Brake Specifications

Motor Family	Minimum Static Torque @120°C		Weight Adder		Power Consumption Nominal	Current <sup>1</sup> @24 V, 20°C	Inertia Adder		Closing Time (engage)	Opening Time (release)	Backlash <sup>2</sup>

Contamination of the motor internal compartment by oil or other foreign materials will result in failure of the brake. Check the suitability of motor sealing for the working environment.

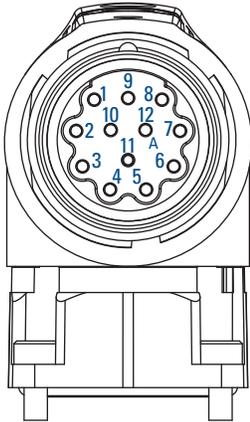

Note 1: Operating Voltage: 24 Vdc ± 10%.

Note 2: Maximum backlash is calculated using worst-case tolerancing, and typical backlash is calculated using statistical tolerancing.

Feedback Device

- For all options see following page
- S Special

Brake

- 2 24 V holding brake
- N** Without brake
- S Special

Connections

- For all options see following page
- S Special

## Feedback Unit Options

Code	Description	Connector Type	Compatible AKM2Gx	Type	Remarks	Lines per rev.	# of revs.	Compatible Drives
CA	SFD3	D	AKM2G2-7 ≤ 20A	Size 10/15/21	Single turn, inductive, 2 lines	11 bit	1	AKD
		J	AKM2G7 > 20A					
GU	Hiperface DSL	D	AKM2G2-7 ≤ 20A	EEM37	Multi-turn Capacitive	17 bit	4096	AKD
		J	AKM2G7 > 20A					
LD	EnDat 2.2	D	AKM2G2-7 ≤ 20A	AKM2G2-4 EQI 1131	Multi-turn Inductive	19 bit	4096	AKD
		J	AKM2G7 > 20A	AKM2G5-7 EQI 1331				
R-	Resolver	Y	AKM2G2	Size 10/15/21	Single turn, inductive	2 poles	1	All
		C	AKM2G3-7 ≤ 20A					
		H	AKM2G7 > 20A					

## Connector Options

Model Designation	Connection	Compatible AKM2Gx	Position of connection
C	2 SpeedTec® M23	AKM2G3 - AKM2G7 ≤ 20 Amps	Angular, rotatable, motor mounted
D*	1 Hybrid M23	AKM2G2 - AKM2G7 ≤ 20 Amps	Angular, rotatable, motor mounted
G	2 SpeedTec® M23	AKM2G3 - AKM2G7 ≤ 20 Amps	Straight, motor mounted
H	1 M40 Power, 1 M23 Feedback	AKM2G7 > 20 Amps	Angular, rotatable, motor mounted
J*	1 Hybrid Connector M40	AKM2G7 > 20 Amps	Angular, rotatable, motor mounted
Y	1 ytec Connector	AKM2G2	Rotatable, motor mounted

\* Hybrid connectors valid for SFD3, DSL, and EnDat Feedback only.

## Connector Description

Connector	Usage	Contacts - Pins Power/Signal	Max. Current [A] Power/Signal	Max. Cross Section [mm <sup>2</sup> ] Power/Signal	Protection Class
M23 SpeedTec right angle connectors (Size 1)	Power & Brake	4 / 5	20 / 10	4 / 1.5	IP65
	Feedback	- / 12	- / 10	- / 0.5	IP65
	Feedback	- / 17	- / 9	- / 0.5	IP65
	Hybrid1*	4 / 5	20 / 10	4 / 1.5	IP65
M40 (Size 1.5)	Power & Brake	4 / 5	75 / 30	16 / 4	IP65
	Hybrid1	4 / 5	75 / 30	16 / 4	IP65
ytec	Power & Brake	4 / 5	14 / 3.6	1.5 / 0.75	IP65
	Feedback	- / 12	- / 5	- / 0.75	IP65
	Feedback	- / 15	- / 5	- / 0.75	IP65

\*Hybrid1 means: Power and SFD3, DSL, or EnDat Feedback (plus brake) on the same connector and in one cable.

# Kollmorgen Recommended Cables

## Dual Cables

Drives:	All AKD Drives	Motor	Feedback Cable
Resolver		AKM2G-xxx-xxYxRx (y-tec)	F5-10-FB2-C2-00-xxxx00
		AKM2G-xxx-xxCxRx (Speed-tec)	F5-10-FB2-A2-00-xxxx00
		AKM2G-xxx-xxGxRx (Speed-tec)	F5-10-FB2-A2-00-xxxx00

Drives:	AKD-x003-06 AKD-x006-06	Motor	Power Cable
Low Power Cables (For use with drives 6A or less at 240V)		AKM2G-xxx-xxYNxx	P5-11-015-C1-00-xxxx00
		AKM2G-xxx-xxY2xx	P6-11-015-C1-00-xxxx00
		AKM2G-xxx-xxCNxx	P5-11-025-A1-00-xxxx00
		AKM2G-xxx-xxC2xx	P6-11-025-A1-00-xxxx00
		AKM2G-xxx-xxGNxx	P5-11-025-A1-00-xxxx00
		AKM2G-xxx-xxG2xx	P6-11-025-A1-00-xxxx00

Drives:	AKD-x003-07 AKD-x006-07 AKD-x012-xx AKD-x024-xx AKD-x048-07	Motor	Power Cable
High Power Cables (For drives operating at greater than 240V and/or 12A)		AKM2G-xxx-xxYNxx	P5-12-015-C1-00-xxxx00
		AKM2G-xxx-xxY2xx	P6-12-015-C1-00-xxxx00
		AKM2G-xxx-xxCNxx	P5-12-025-A1-00-xxxx00
		AKM2G-xxx-xxC2xx	P6-12-025-A1-00-xxxx00
		AKM2G-xxx-xxGNxx	P5-12-025-A1-00-xxxx00
		AKM2G-xxx-xxG2xx	P6-12-025-A1-00-xxxx00
		AKM2G-xxP-xxxNxx	P5-12-060-A4-00-xxxx00
		AKM2G-xxP-xxx2xx	P6-12-060-A4-00-xxxx00

		AKM2G-xxR-xxxxLD	H2-13-100-B4-00-xxxx00

## AKD-N Cables

Drives:	AKD-N003 AKD-N006 AKD-N012	Motor	Cable
Hybrid Cable (AKD-N Drives)		AKM2G-xxx-xxxxCA	H6-33-025-A1-00-xxx00
		AKM2G-xxQ-xxxxGU	H6-33-025-B1-00-xxx00

For complete AKM2G, AKD model nomenclature, refer to pages 66 and 74 respectively.

# ▶ AKD<sup>®</sup> Servo Drive

**Our AKD series is a complete range of Ethernet-based servo drives that are fast, feature-rich, flexible and integrate quickly and easily into any application.** AKD ensures plug-and-play commissioning for instant, seamless access to everything in your machine. And, no matter what your application demands, AKD offers industry-leading servo performance, communication options, and power levels, all in a smaller footprint.

This robust, technologically advanced family of drives delivers optimized performance when paired with our best-in-class components, producing higher quality results at greater speeds and more uptime. With Kollmorgen servo components, we can help you increase your machine's overall equipment effectiveness (OEE) by 50%.

## The Benefits of AKD Servo Drive

- Optimized Performance in Seconds
  - Auto-tuning is one of the best and fastest in the industry
  - Automatically adjusts all gains, including observers
  - Immediate and adaptive response to dynamic loads
  - Precise control of all motor types
  - Compensation for stiff and compliant transmission and couplings
- Greater Throughput and Accuracy
  - Up to 27-bit-resolution feedback yields unmatched precision and excellent repeatability
  - Very fast settling times result from a powerful dual processor system that executes industry-leading and patent pending servo algorithms with high resolution
  - Advanced servo techniques such as high-order observer and bi-quad filters yield industry-leading machine performance
  - Highest bandwidth torque-and-velocity loops. Fastest digital current loop in the market
- Easy-to-use Graphical User Interface (GUI) for Faster Commissioning and Troubleshooting
  - Six-channel real-time software oscilloscope commissions and diagnoses quickly
  - Multi-function Bode Plot allows users to quickly evaluate performance
  - Auto-complete of programmable commands saves looking up parameter names
  - One-click capture and sharing of program plots and parameter settings allow you to send machine performance data instantly
  - Widest range of programming options in the industry
- Flexible and Scalable to Meet any Application
  - 3 to 48 Arms continuous current; 9 to 96 Arms peak
  - Very high power density enables an extremely small package
  - True plug-and-play with all standard Kollmorgen servo motors and actuators
  - Supports a variety of single and multi-turn feedback devices – Smart Feedback Device (SFD/SFD3), EnDat 2.2, EnDat 2.1, BiSS, analog Sine/Cos encoder, incremental encoder, HIPERFACE®, and resolver
  - Tightly integrated Ethernet motion buses without the need to add large hardware: EtherCAT®, SynqNet®, Modbus® TCP, EtherNet/IP™, PROFINET® RT, SERCOS® III, and CANopen®
  - Scalable programmability from base torque-and-velocity through multi-axis master

# AKD<sup>®</sup> Servo Drive

The AKD servo drive delivers cutting-edge technology and performance with one of the most compact footprints in the industry. These feature-rich drives provide a solution for nearly any application, from basic torque-and-velocity applications, to indexing, to multi-axis programmable motion with embedded Kollmorgen Automation Suite™. The versatile AKD sets the standard for power density and performance.

AKD<sup>®</sup> SERVO DRIVE

AKMH<sup>™</sup> Hygienic Stainless Steel Motors

AKM & AKM<sup>®</sup> 2G Servo Motors

Frameless Brushless Direct Drive Motors

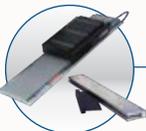

AKD<sup>®</sup>-N Decentralized Servo Drive

Cartridge DDR<sup>®</sup> Motors

Housed DDR<sup>®</sup> Motors

Direct Drive Linear Motors

Linear Actuators

Multi-Axis Precision Tables

AKD<sup>®</sup> Servo Drive

Control of motors with AKD<sup>®</sup> PDMM programmable multi-axis master

### Best-in-Class Components

AKD works seamlessly with Kollmorgen motors and actuators—well-known for quality, reliability, and performance.

## General Specifications

120 / 240 Vac 1 & 3 Phase (85 - 265 V)	Continuous Current (Arms)	Peak Current (Arms)	Drive Continuous Output Power Capacity (Watts)	Internal Regen (Watts) (Ohms)		Height mm (in)	Width mm (in)	Depth mm (in)	Depth with Cable Bend Radius mm (in)
AKD-x00306	3	9	1100	0	0	168 (6.61)	59 (2.32)	156 (6.14)	184 (7.24)

Note 1: For complete AKD model nomenclature, refer to page 74.  
 Note 2: Additional AKD information can be found online.

# AKD Servo Drive Nomenclature

## AKD® Servo Drive

**AKD – B 003 06 – NB AN – 0000**

AKD Series

Version

B = Base drive

C = Central power supply for AKD-N (Requires CB Extension)

N = Decentralized drive (Requires DB, DF, or DS Extension)

P = Position indexer (motion tasking)

T = AKD BASIC Language Programmable drive (Requires IC or NB Extension)

M = Multi-axis Master Drive (Requires M1 or MC Extension option and EC Connectivity option)

Current Rating

003 = 3 Amp

006 = 6 Amp

010 = 10kW (for AKD-C, this field refers to power.)

012 = 12 Amp

024 = 24 Amp

048 = 48 Amp

Voltage

06 = 120/240 Vac 1Ø/3Ø (24 Amp Drive: 240 Vac 3Ø only)

07 = 240/480 Vac 3Ø (Version C: 07 = 400/480 Vac 3Ø | Version N: 07 = 560/680 Vdc)

Variants

0000 = Standard

Connectivity\*

AN = Analog command

CN = CANopen®

EC = EtherCAT®

EI = EtherNet/IP™

PN - PROFINET®

SQ = SynqNet®

Drive Version Availability

B, P, T

P

C, M, N, P

P

P

B

\*Motion Tasking is included as a free upgrade with CN, EC, EI and PN

Extension

CB = Without extension (AKD-C version only)

DB = Hybrid motor cable (AKD-N version only)

DF = Additional EtherCAT® port + feedback connector (AKD-N version only)

DS = Local STO + feedback connector (AKD-N version only)

IC = Expanded I/O version and SD card slot (AKD-T version only)

M1 = High performance multi-axis controller

MC = Standard multi-axis controller

NB = Without extensions

Note: Options shown in blue text are considered standard.

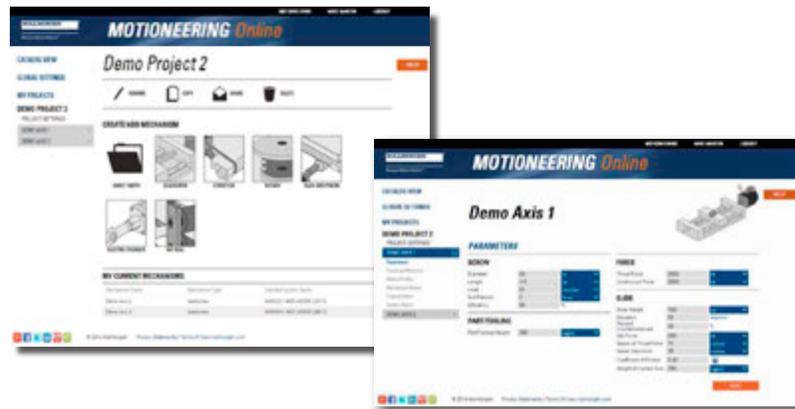

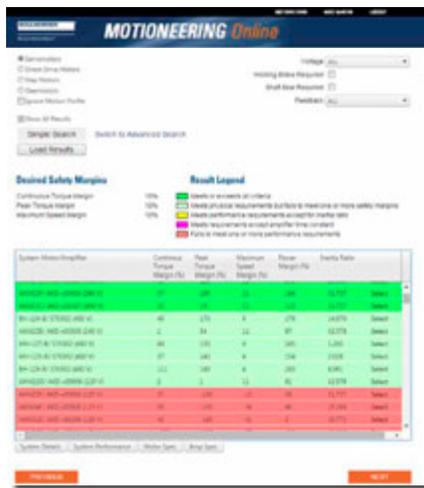

# MOTIONEERING® Online

MOTIONEERING® Online – Kollmorgen has revamped, modernized and put online one of the most respected applications sizing programs of the last 20 years. You now can access this application sizing and selection tool wherever you have access to the internet. MOTIONEERING Online is just a start of a series of releases that will empower you to optimize solutions for your toughest applications. Sizing frameless motors and drive systems has never been easier. Using a mechanism project concept for collecting and saving multiple axes of load information, MOTIONEERING® Online can automatically calculate application results and compare against a catalog of systems - recommending the most optimized set of Kollmorgen system solutions available.

Versatile units-of-measure selection options for mechanism and motion profile data-entry, with the ability to convert data into other available units, makes this a convenient international tool. A user-friendly Help file teaches program functions and algorithms used to provide results.

## Mechanism Projects

- Direct Entry, lead screw, conveyor
- Rack and pinion, nip rolls
- Direct Drive Rotary
- Electric Cylinder
- Direct data entry

## Solution Set Search Screen

- Color-coded indication of system’s ability to meet application requirements
- Review system components specifications
- Save, print, or create a pdf application report
- Evaluate system performance curve with application points

## MOTIONEERING® Online Features:

- Inertia Calculator - lets you build up inertia based on odd shapes by additive or subtractive methods
- Custom Motion Profile - easy to add entire segments or copy segments to repeat
- Environmental Factor - takes into account your ambient temperature
- Project by Project Units - You can tailor your units on a project by project basis, or use the global units settings

## MOTIONEERING Online Supported Browsers

- IE, Chrome, Firefox, Safari

[www.kollmorgen.com/motioneering](http://www.kollmorgen.com/motioneering)

## About Kollmorgen

Since its founding in 1916, Kollmorgen's innovative solutions have brought big ideas to life, kept the world safer, and improved peoples' lives. Today, its world-class knowledge of motion systems and components, industry-leading quality, and deep expertise in linking and integrating standard and custom products continually delivers breakthrough motion solutions that are unmatched in performance, reliability, and ease-of-use. This gives machine builders around the world an irrefutable marketplace advantage and provides their customers with ultimate peace-of-mind.
